What's New In?

LetmeSync is a tool, that allows you to synchronize files between various cloud storages in a matter of seconds, it's fast, easy to use and has a friendly interface. Here's the list of supported cloud storages: Dropbox SkyDrive SugarSync Carbonite Just Cloud OpenDrive Zip Cloud Yousendit Features: LetmeSync allows you to choose what types of content you wish to synchronize (for instance, documents, photo, music), as well as to create a list of extensions for the files to be processed. If you selected some content to synchronize, letmeSync will ask you what you want to do with the selected files: -keep -delete -overwrite -copy -move -compress -upload -batch upload -download After you choose the actions you want to apply to the files, letmeSync will download files to your computer, or upload files to your cloud storage. You can also transfer files through e-mail (copy and paste) or send the link to share your files. Once you decide to synchronize your files, you will choose a transfer path as well as a time and schedule for the synchronization process to start. LetmeSync is super easy to use, no technical knowledge is required to use it. LetmeSync doesn't require special privileges on your cloud account, so you can use it for free. You also have the option to check for new files, delete or compress your old files, or change the sync interval if you want to. LetmeSync Features: *Create a list of extensions for the files to be processed *Extract and archive files *Backup and restore files *Download files from cloud storages *Upload files to cloud storages *Create a new list of files *Select multiple files *Select content from your cloud storages *Download and compress your files *Check for new files *Clear your files *Select the interval of your files *Get new files without the need to sync *Delete old files *Create a queue of files to be processed *Sync files between cloud storages *Sync files with contacts *Transfers files through e-mail *Manage your cloud accounts *Check for new cloud storage accounts *Check for new cloud file accounts *Check for
