About This Game

Great first-person shooter with excellent graphics and fun gameplay. In the city where you live as a retired soldier, one night scary creatures rushed in, followed closely by soldiers. Their task is to eliminate all monsters that escaped from their laboratories, as well as all the people who saw too much! Your mission is to get out of town and move far away from here. However, everything is never as easy as it looks...

I love board games! But the art is pretty bad, so are the jokes. the chars (heroes) pretty friggin unoriginal: but its a friggin board game so yea I love those (wait said that already). Yea no local multi-player..... WHYIts a board game. \ 1 XD rating- DEV BAILED WOOO. Don't judge this game for its graphics , although it's a short game , it's one of the best games I've played in a while . There's so much to be unpacked with this game . Also a warning to people who have photosensitivity issues or get easily motion sickness this game might not be for you as there's a mission where these affect ypu. This helped build Waste Walkers.

<http://store.steampowered.com/app/371100>. was a verygood game but kept crashing waste of money down loading. this game has bad mechanics. rllly bad on racing. and looks bad. fun hobby project. but not a game to enjoy

This game is amazing, and worth the price. If you loved Warcraft (not WoW), AoE, and the ilk, or maybe some casual simming, or a ghoulish rpg. Lots of classes, skills, and resources. I mean, I can't pin this game down. If you love strategy games, just give it a whirl. I got it for 7.99, would have paid the 9.99.. Overall, not a bad game. Had fun for a few hours, definitely had way worse experience with games I spent a lot of money on.

Pro: - Good and challenging bots

- A little customization, would love if it would be expanded
- Ability to customize your own team of bots

Cons : - Lack of more maps

- A few occasional bugs
- Too few people to play with

I had fun and would recommend for others to try out as well. There's nothing to lose mate :D. This is a 7/10 for me overall

Graphics:

They are amazing for this style of play for such a quality game on lower titles compared to others.

Sound:

Has a great soundtrack to match its gameplay.

Controls:

Sometimes they are tough to use yet with some getting used to they aren't hard to use.

Overall it has good quality for those looking to just not do a lot just relax, if you're looking for intense action the battles are boring not amusing. Not a game for fast paced action player.. what a disgusting ♥♥♥♥♥ing dog♥♥♥♥♥version of boom beach copy.. This is the only game so far that makes my videocard (gtx1060) to produce coil whine/hissing. As I understand it happens only on videocard load, and no other game made it that far. So it looks like bad optimization.... This is an okay game. It can get quite confusing at sometimes though. The tracks are way too complex and hard to figure out. But all up it's still pretty good.. Fun little arcade racer, nice software rendered graphics. Crashes after few races, but because of autosave I won't lose progress. Cringy Voice Acting. Is all I can think of that's bad about this game. It's a fluid well thought out platforming rpg adventure. With an ending that's rather satisfying, the combat system is fluid and works well, the boss fights are really quite good. The sound track is great. The comic book style cutscenes are great, really nice touch. The game is one that does fuf, You don't have enemies waiting for you to attack that guy. "Oh your killing him ill wait". NOPE! they will pile on you and on nightmare it's excellent fun! A solid well rounded platforming action adventure rpg. If you played this as a kid like I did then it's well worth revisiting :).

And I'm sorry but if you can't run this game properly there's something wrong with your computer ... or your running a single core laptop.. One of the worst games I have ever played. Should be called Buggerdale.
